-!- FUNCTION: THE 120 KDA SURFACE-EXPOSED PROTEIN IS A MAJOR
STRUCTURAL PROTEIN WHICH MAY PLAY A ROLE AS A RICKETTSIAL
VIRULENCE FACTOR AND/OR IMMUNOGEN DURING INFECTION.
-!- FUNCTION: THE 32 KDA BETA PEPTIDE MAY SERVE AS A MEMBRANE ANCHOR.
-!- SUBCELLULAR LOCATION: CELL WALL. THIS BACTERIUM IS COVERED BY A
S-LAYER WITH HEXAGONAL SYMMETRY.

Immun. 60:159-165(1992).

-infect. Immun. 60:159-165(1992).

-i. FUNCTION: THE 120 KDA SURFACE-EXPOSED PROTEIN IS A MAJOR

STRUCTURAL PROTEIN WHICH MAY PLAY A ROLE AS A RICKETTSIAL

STRUCTION: THE 32 KDA DEPARTOR NUMINOGEN DURING INFECTION.

-i. FUNCTION: THE 32 KDA BEPTIDE MAY SERVE AS A MEMBRANE ANCHOR.

-i. SUBCELLULAR LOCATION: CELL WALL. THIS BACTERIUM IS COVERED BY A S-

LAYER WITH HEXAGONAL SYMMETRY.

FUNCTION: PROTEASE WHICH BREAKS DOWN MILK PROTEINS DURING THE GROWTH OF THE BACTERIA ON MILK.

CATALYTIC ACTIVITY: ENDOPEPTIDASE ACTIVITY WITH VERY BROAD SPECIFICITY, ALTHOUGH SOME SUBSITE PREFERENCE HAVE BEEN NOTED, E.G. LARGE HYDROPHOBIC RESIDUES IN THE PI AND PA POSITIONS, AND PRO IN THE P2 POSITION. BEST KNOWN FOR ITS ACTION ON CASEINS, ALTHOUGH IT HAS BEEN SHOWN TO HYDROLYSE HEMOGLOBIN AND OXIDIZED
                                                                                                                                 SUBCELLULAR LOCATION: TYPE I MEMBRANE PROTEIN. CELL WALL. SIMILARITY: BELONGS TO PEPTIDASE FAMILY S8; ALSO KNOWN AS THE SUBTILASE FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     CYTOPLASMIC (POTENTIAL).

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Bacteria; Firmicutes; Bacillus/Clostridium group; Streptococcaceae;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Venema G.;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      APP1. EDVIYON. MICROBIOL. 54:231-238(1988).
-!- FUNCTION: PROTEASE WHICH BREAKS DOWN MILK PROTEINS DURING THE GROWTH OF THE BACTERIA ON MILK.
-!- CATALYTIC ACTIVITY: ENDOPEPTIDASE ACTIVITY MITH VERY BROAD SPECIFICITY, ALTHOUGH SOME SUBSITE PREFERENCE HAVE BEEN NOTED, E.G. LARGE HYDROPHOBIC RESIDUES IN THE P1 AND P4 POSITIONS, AN PRO IN THE P2 POSITION. BEST KNOWN FOR ITS ACTION ON CASEINS,

"Primary structure and organization of the gene for a procaryotic, cell envelope-located serine proteinse.";
J. Biol. Chem. 264:13579-13585[1989].
-I- FUNCTION: PROTEASE WHICH BREAKS DOWN MILK PROTEINS DURING THE GROWTH OF THE BACTERIA ON MILK.
-I- SUBCELLULAR LOCATION: TYPE I MEMBRANE PROTEIN. CELL WALL.
-I- SIMILARITY: BELONGS TO PEPTIDASE FAMILY S8; ALSO KNOWN AS THE SUBTILASE FAMILY.
                                                                   --GETVQYS
